OPEN LETTER

15.04.2022

To whom it may concern,

The Boel Company is a strong advocate for peace and freedom throughout the World. We cannot keep our eyes closed to the ongoing events, therefore we are taking the following steps to be 100% independent from the Russian politics:

1. Our company's main founder, Denis Postovoy, personally moved to the United States of America to continue doing business, regardless of politics.
2. All investment projects and new developments were terminated within the Russian Federation.
3. Stable supply and the level of assurance remain our key priorities. In this regard, the production of iTap with full quality control is now completely concentrated in our factory in Shenzhen China.
4. Our chief aim is to create maximum convenience for our clients. For the comfort of working with our company, we remind you that we have sales offices and warehouses in Hong Kong, Florida USA, the European Union and Brazil.
5. Depending on your priorities, we offer a contract with SIA Boel Latvia or JST Hong Kong and receive individual commercial terms for the supply.
6. We have decided that at this moment we will donate percentage from our sales to support refugees from Ukraine.

Sincerely,

Founder and owner of JST Group Limited

Denis Postovoy
